

The World Leader in Corneal Remodeling™

Historical Usual, Customary, and Reasonable (UCR) Fees for Selected Ophthalmology Procedures

The table below contains the published 2017 usual, customary and reasonable (UCR) fees for selected ophthalmology procedures. This list is not exhaustive.

AMA CPT ¹	Descriptor	Physician Published UCR Fee ²		
		50 th percentile	75 th percentile	90 th percentile
65730	Keratoplasty (corneal transplant); penetrating (except in aphakia or pseudophakia)	\$3714	\$5224	\$7407
65770	Keratoprosthesis	\$4522	\$6360	\$9018
65780	Ocular surface reconstruction; amniotic membrane transplantation, multiple layers	\$2116	\$2977	\$4221
65775	Corneal wedge resection for correction of surgically induced astigmatism	\$1768	\$2486	\$3525
65785	Implantation of intrastromal corneal ring segments (includes data professional fees only, as well as for professional and technical fees for in office procedures; see note below)	\$7003	\$9849	\$13965

- **Note:** Most of the UCR fees listed above are for physician services (professional fees) when performed in a facility setting (e.g., HOPD or ASC). However, the data for AMA CPT code 65785 includes fees for services provided both in the facility and office setting of care. Total charges for an in-office procedure are generally higher, when compared to charges for professional fees corresponding to procedures performed in facility settings.
- Per the publisher, the UCR fees listed above were developed from over 400 million physician charges over a period of several years.² The UCRs listed above represent the PMIC published UCRs for 2017.
